

ANIL GHIMIRE

Full Stack Developer (MERN) — Node.js · React.js · Next.js

ghimireaneel50@gmail.com · +977 9824114230 · Pokhara, Nepal (open to remote)
Portfolio: anil-ghimire.com.np · LinkedIn: anil-ghimire-0b3827327 · GitHub: Anilghimire10

SUMMARY

Full Stack Developer with 2.5+ years building and shipping production SaaS platforms on the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js/Nest.js. Experienced in designing REST APIs, real-time features (Socket.io), background job processing, and third-party integrations (payments, OCR, OpenAI). Comfortable owning features end-to-end — from data modeling to production deployment on DigitalOcean with Nginx and SSL.

EXPERIENCE

Node.js Developer — Brand Builder

Jan 2024 – Present

Pokhara, Nepal (Remote-friendly)

- Built and maintained scalable REST APIs with Node.js and Express.js serving thousands of daily requests in production for live SaaS platforms (POS, ordering, billing).
- Optimized MongoDB queries and data models, cutting key query response times by ~30%.
- Engineered background job workflows for long-running and IoT data-processing tasks using Node.js async patterns, improving throughput and reliability.
- Implemented authentication, payment, and real-time features end-to-end, integrating React.js frontends with Node.js/Express.js backends.
- Owned production deployments on DigitalOcean — configured Nginx and HTTPS/SSL (Let's Encrypt).

FEATURED PROJECTS

Rebuzz POS System • LIVE · Web · iOS · Android

Node.js · Express.js · MongoDB · REST APIs Web: web.rebuzzpos.com · iOS & Android: apps.apple.com/fj/app/rebuzz-pos/id6454851867

- POS for restaurants, retail, and salons: inventory & sales tracking, card/mobile/cash payments, split payments (cash + QR), role-based access, discounts, and analytics.
- Built real-time inventory and transaction-processing APIs optimized for high-volume, peak-hour loads.

Rebuzz Ordering — Marketplace • LIVE · Web · iOS · Android

Node.js · Express.js · MongoDB · REST APIs Web: shop.rebuzzpos.com · iOS & Android: apps.apple.com/us/app/rebuzz-ordering/id6504554140

- Multi-vendor ordering marketplace: browse vendors by category, cart, delivery and payment options, deals, and one-tap reordering.
- Built and consumed the REST APIs powering both the web and mobile clients.

We Pokhara — Community Networking App • LIVE · iOS & Android

Node.js · Express.js · MongoDB · OpenAI Embeddings App Store: apps.apple.com/us/app/we-pokhara/id6757301029

- Community app connecting Pokhara residents with verified local news, events, and offers.
- Built semantic search with OpenAI embeddings to improve content discovery.
- Built a custom web-scraping pipeline to aggregate and curate local news from multiple sources.

GharBhada — Rental Platform • LIVE · Web

MongoDB · Express.js · React.js · Node.js Live: rental-nine-sooty.vercel.app · GitHub: github.com/Anilghimire10/Rental

- Complete rental marketplace for Pokhara — rooms, flats, houses, office spaces and shops, with category browsing, search/filters, and listing management.

Electricity Billing System

Node.js · Express.js · React.js · Flutter · Fonepay

- Backend for an electricity billing system deployed for a single utility organization in Sikles.
- Powers a React.js admin web panel and a Flutter mobile app for field employees (meter readings + bill collection), with Fonepay online payments.
- Built the Node.js/Express REST APIs, data models, and billing logic.

CHRONOLUXE — Watch Marketplace

[Next.js](#) · [React.js](#) · [Node.js](#) · [MongoDB](#) [GitHub: github.com/Anilghimire10/watch-frontend](#)

- Curated marketplace for buying and selling authenticated luxury watches, with condition-verified listings, search by maison, wishlists, and an offer/checkout flow.

Inventory Management System *(Self-Directed)*

[Next.js](#) · [Nest.js](#) · [PostgreSQL](#) [GitHub: github.com/Anilghimire10/inventory](#)

- Production-style full-stack app with a real-time dashboard — sales/revenue trends, stock and expiry tracking, POS, customers, suppliers, and purchases.

Workhub — Freelance Marketplace *(Final Year Project)*

[MongoDB](#) · [Express.js](#) · [React.js](#) · [Node.js](#) [GitHub: github.com/Anilghimire10/WorkHub](#)

- Full-stack MERN marketplace with user profiles, job postings, bidding, and payment processing.

Also built: an OCR + AI expense tracker (Taggun + OpenAI with Square POS sync), a bus-booking system (Khalti), and a social platform (Wellwishers).

SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js

Backend: Node.js, Express.js, Nest.js, REST API design, Socket.io

Databases: MongoDB, PostgreSQL, MySQL, Supabase

Concepts: Asynchronous programming, background job processing, system design, semantic search

Integrations / APIs: OpenAI API, Taggun OCR, payment gateways (Square, Fonepay, Khalti)

DevOps / Tools: DigitalOcean, Nginx, SSL (Let's Encrypt), Git, GitHub

EDUCATION

Bachelor's in Computer Engineering

Sep 2019 – Sep 2024

Gandaki College of Engineering and Science

LANGUAGES

English (Fluent) · Nepali (Native) · Hindi (Conversational)
